

Change Analysis

Another experiment to look at rate of change. Idea here is to compare the reported change against the cumulative sum.

Last date for states data is 2020-06-09

Extract daily changes

Daily Cases

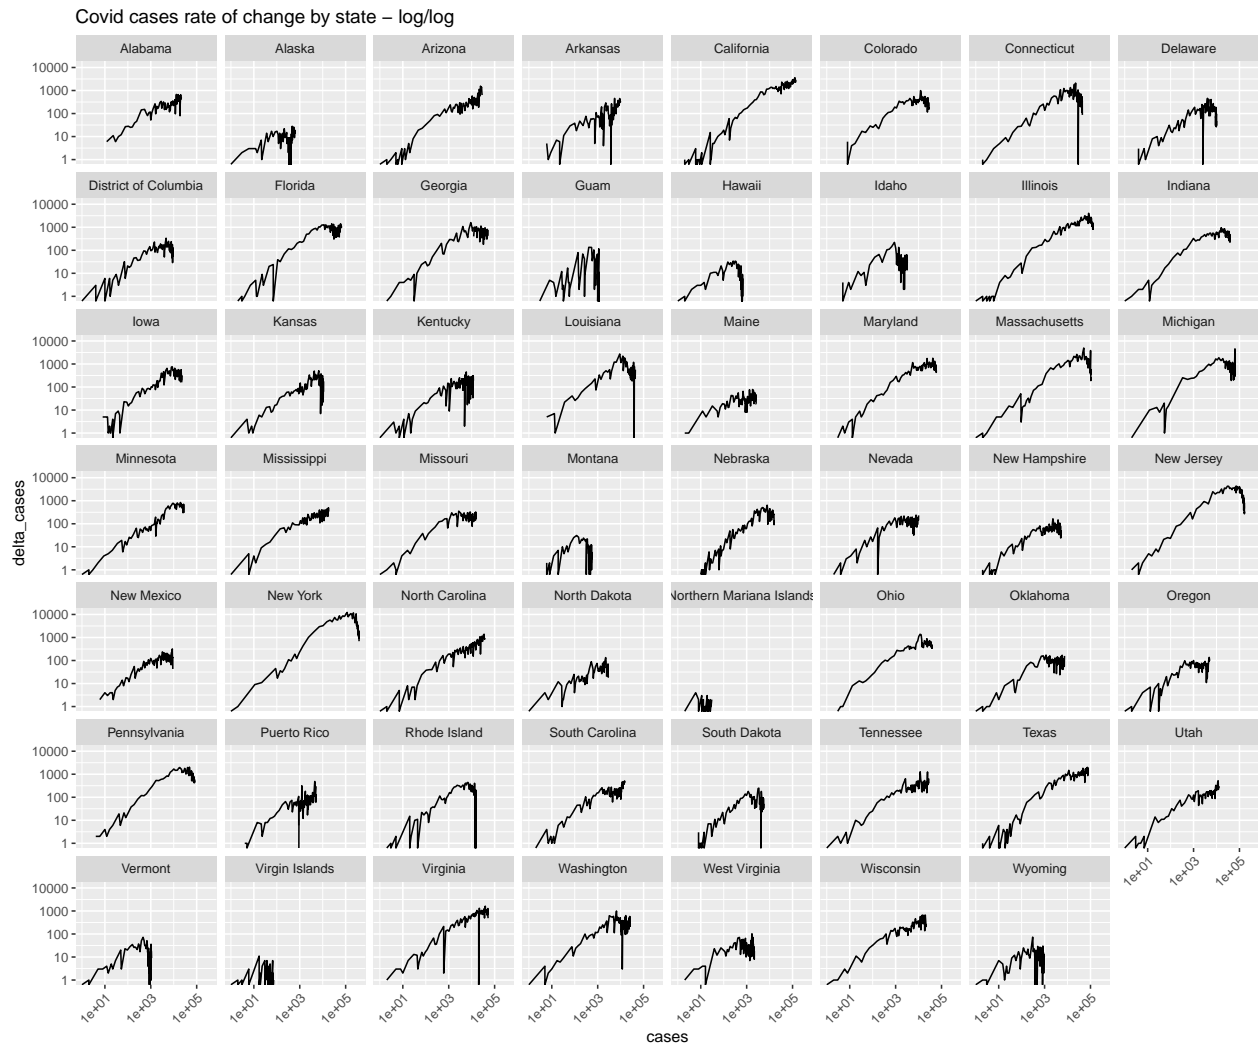

Daily Deaths

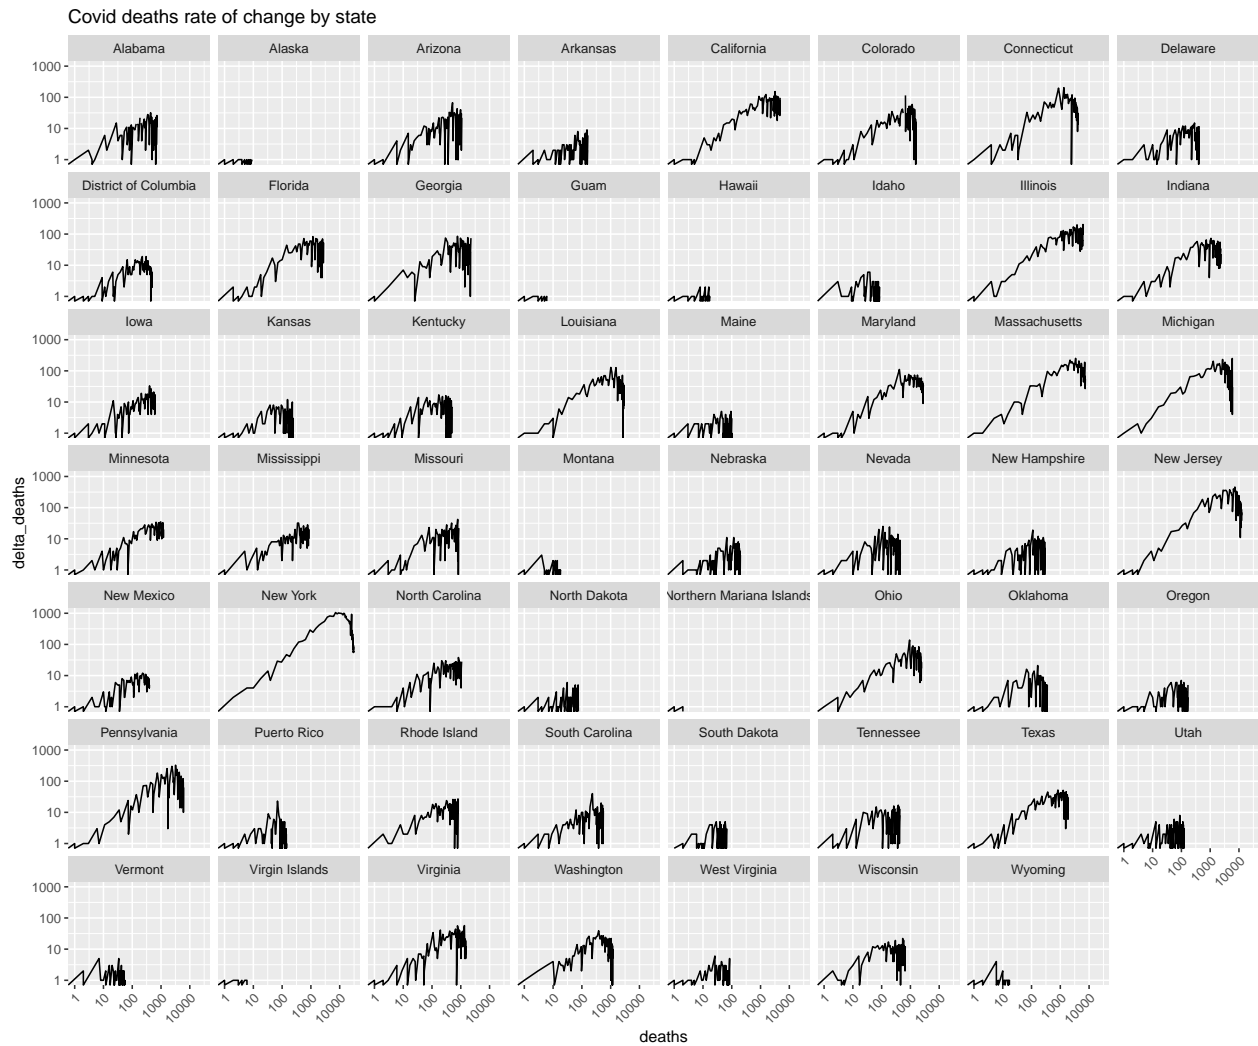

Log of Change Over Cumulative Sum

Linear values are skewed by higher-magnitude values, so use a $\log(10)$ on each axis. this better fits the exponential nature of the data anyway.

Log/Log of Cases Over Cumulative Sum

Log/Log of Deaths over Cumulative Sum

Weekly Rate of Changes

In order to smooth out the curves in the previous graphs, look at them on a weekly basis.

Weekly Range of Change of Cases by State

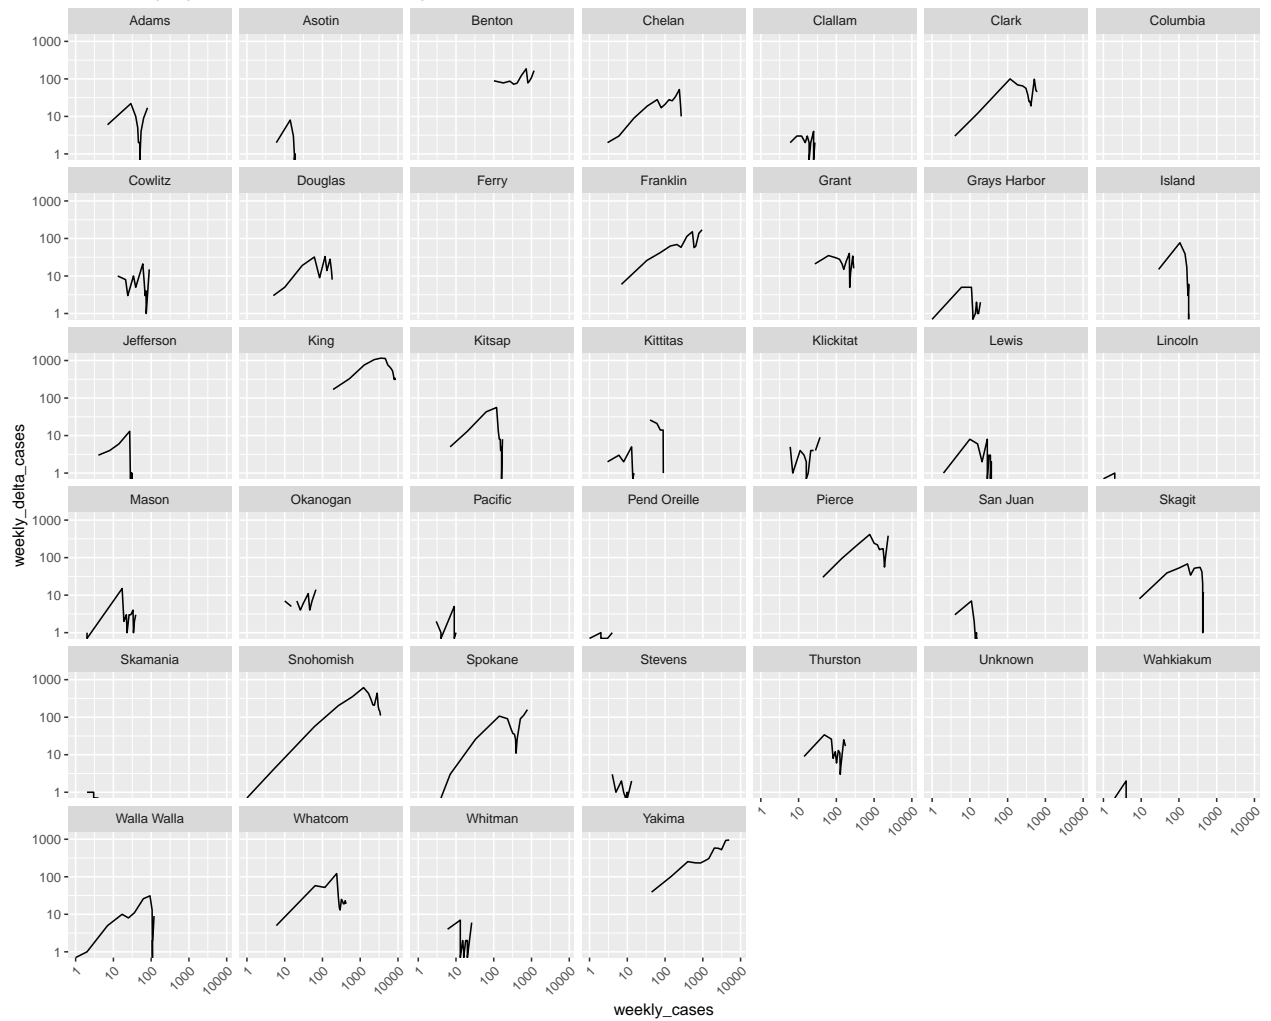

Weekly Range of Change of Deaths by State

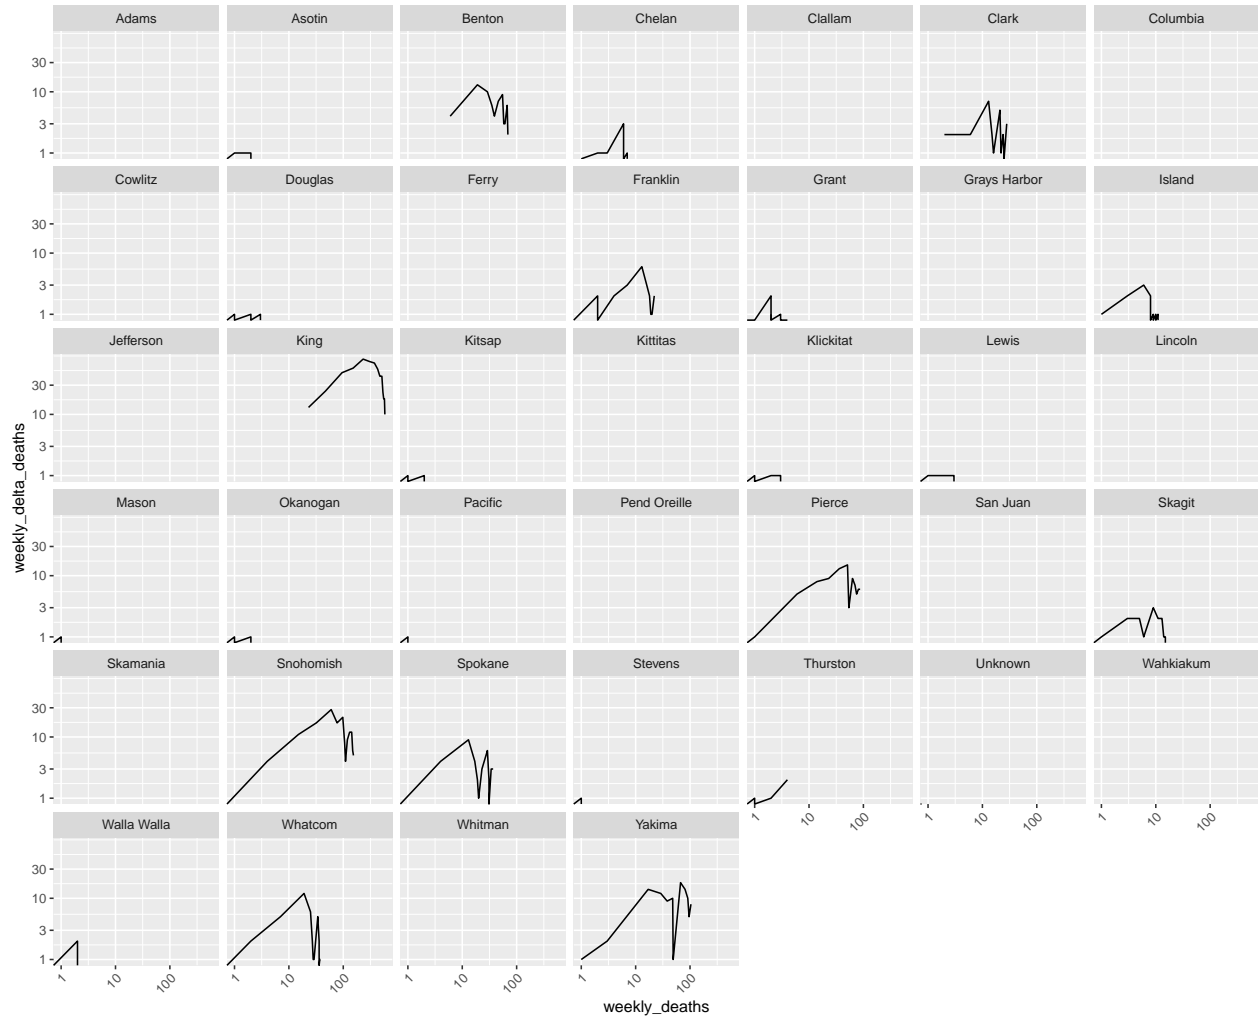

Washington Counties

Covid – log/log weekly cases rate of change by WA Counties

Covid – log/log weekly deaths rate of change by WA Counties

California Counties

Covid – log/log weekly cases rate of change by CA Counties

Covid – log/log weekly deaths rate of change by CA Counties
