

# quick-analysis by state and WA county

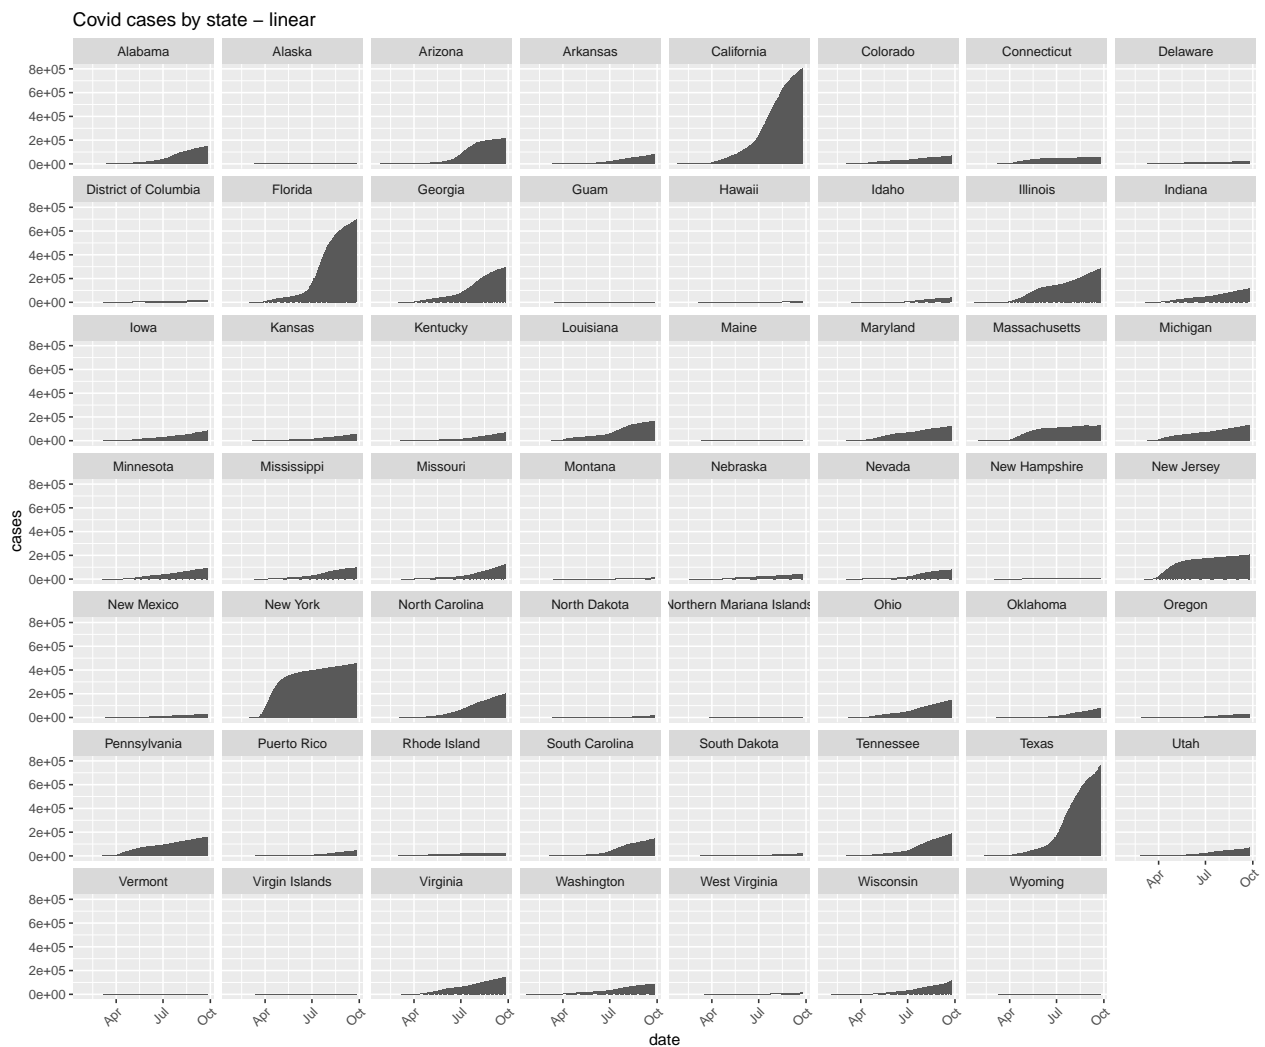

A quick visualization of the published NYT data on US Covid-19 cases by state. Source data may be found here: <https://github.com/nytimes/covid-19-data>

There are two types of graphs here currently:

- Linear - this is just an absolute count reported by date
- $\log(2)$  - this is a  $\log(2)$  graph of count by date, intended to help display the doubling trend

Note that this data is historical, not predictive. It's intended to help illustrate what has happened so far.

## US Data - Cases

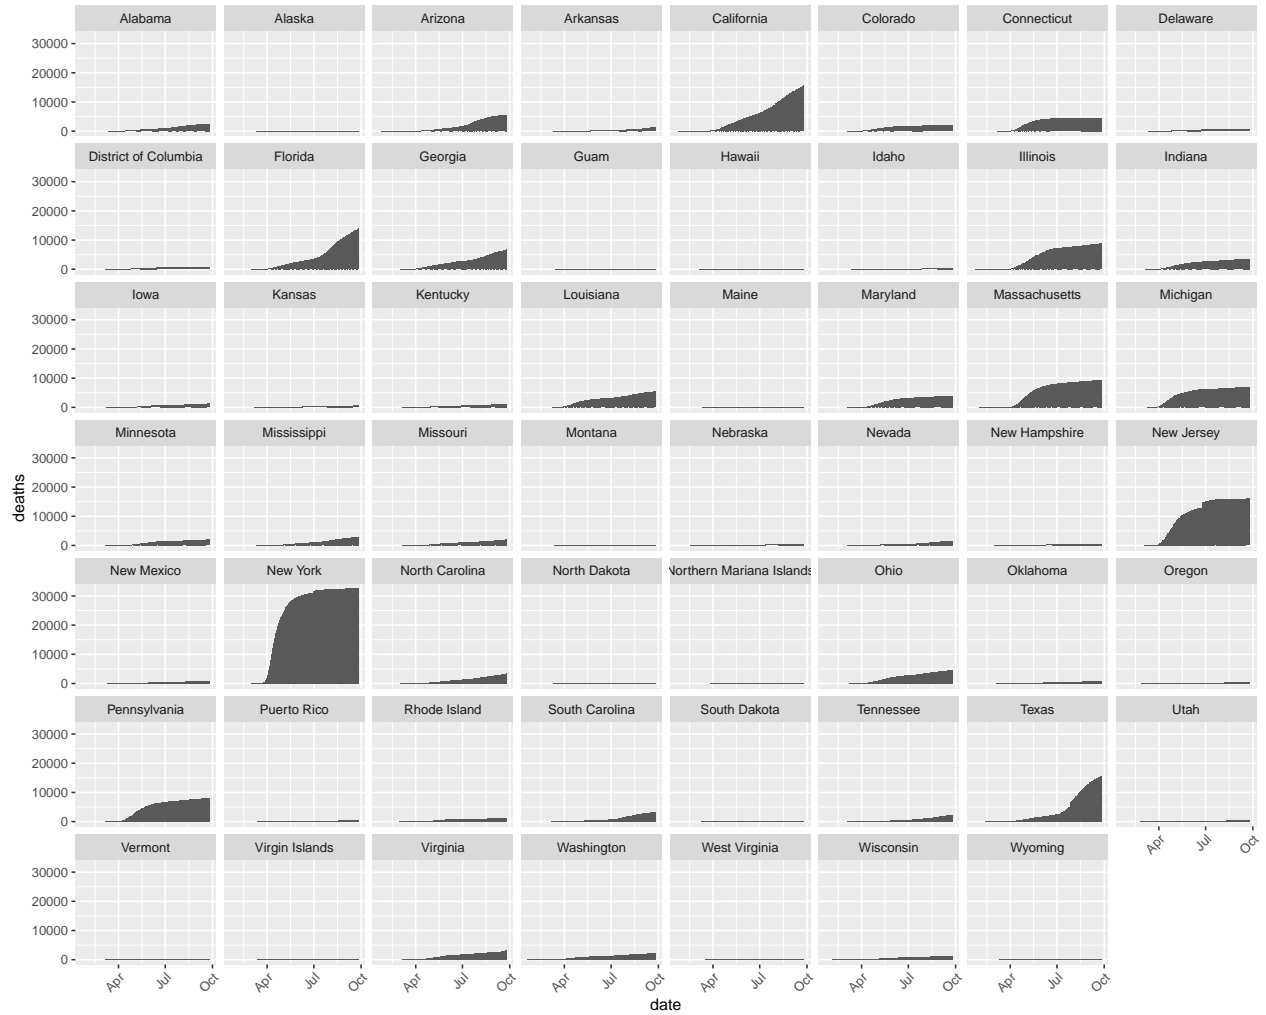

Covid cases by state – log(2)

## US Data - Deaths

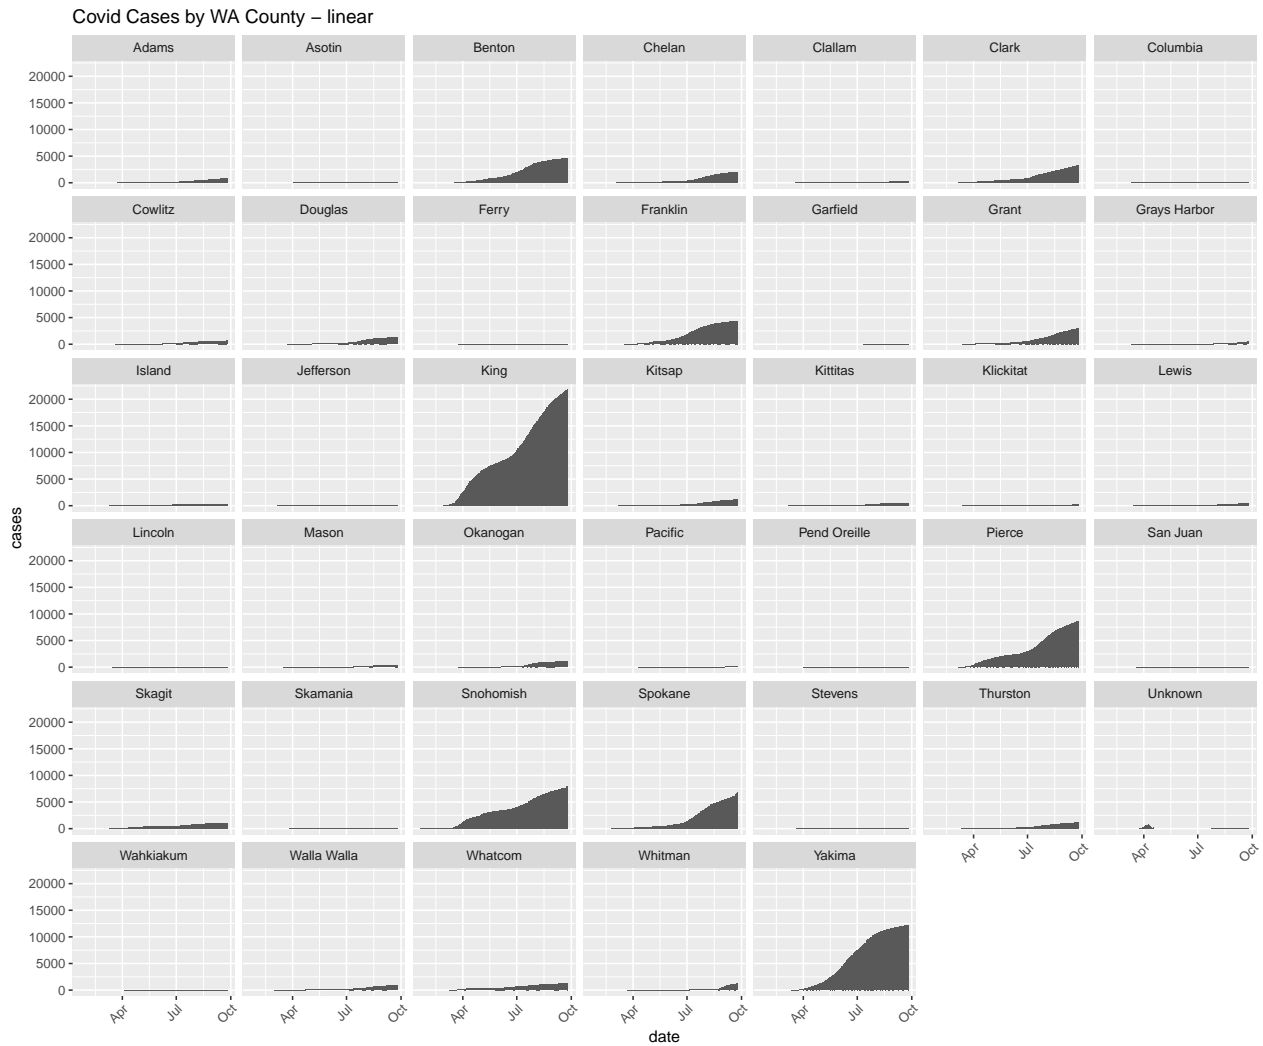

Covid Deaths by state – linear

Covid deaths by state – log(2)

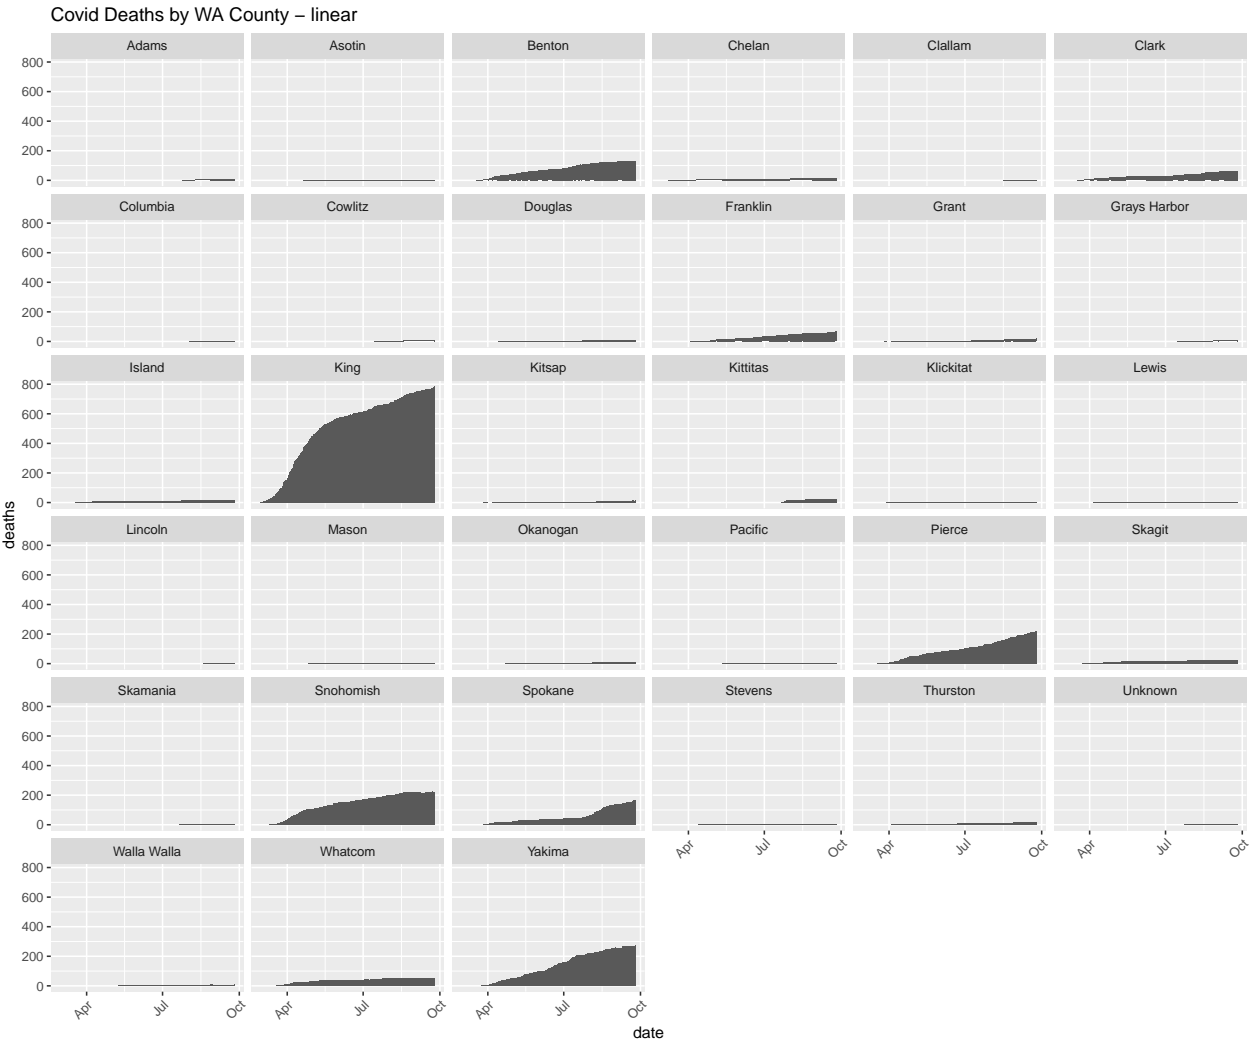

## Washington Counties - Cases

Covid Cases by WA County – log(2)

# Washington Counties - Deaths

Covid Deaths by WA County – log(2)

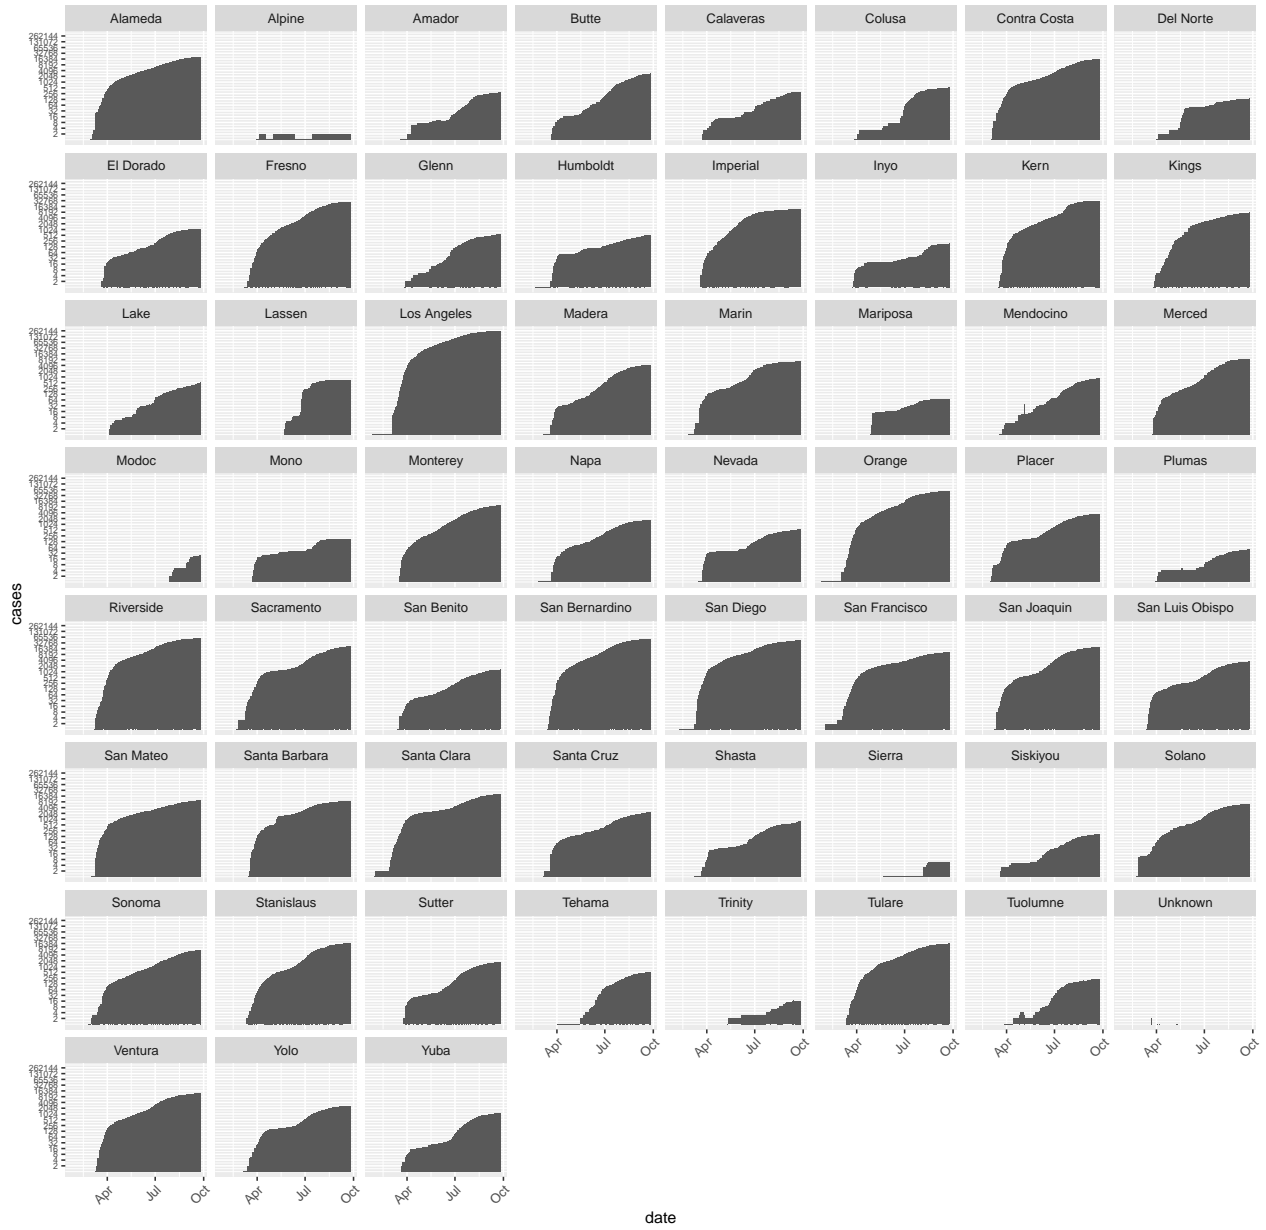

## California Counties - Cases

## Warning: Transformation introduced infinite values in continuous y-axis

## Warning: Removed 3 rows containing missing values (geom\_col).

Covid Cases by CA County – log(2)

# California Counties - Deaths

Covid Deaths by CA County – log(2)
