Change Analysis

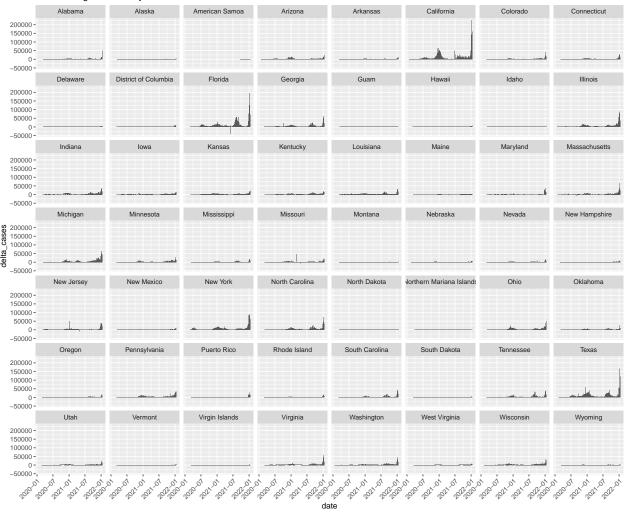

Another experiment to look at rate of change. Idea here is to compare the reported change against the cumulative sum.

Last date for states data is 2022-01-16

Extract daily changes

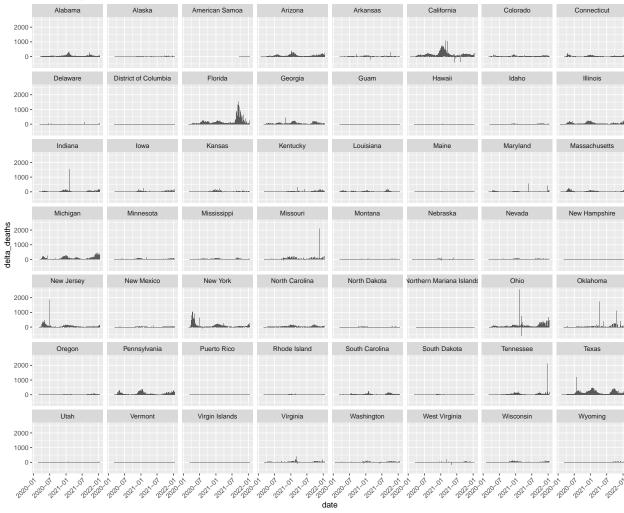

Daily Cases

Covid change in cases by state - linear

Daily Deaths

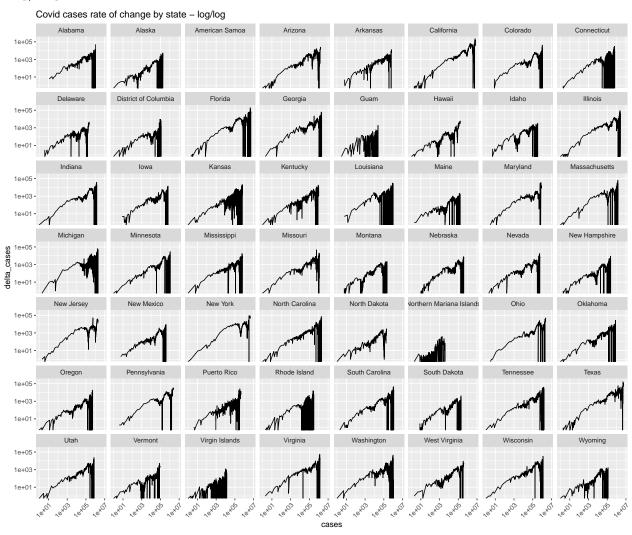

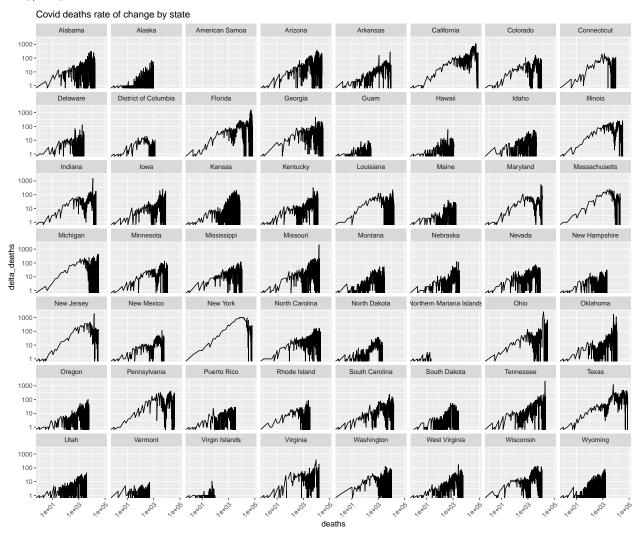

Log of Change Over Cumulative Sum

Linear values are skewed by higher-magnitude values, so use a log(10) on each axis. this better fits the exponential nature of the data anyway.

Log/Log of Cases Over Cumulative Sum

Log/Log of Deaths over Cumulative Sum

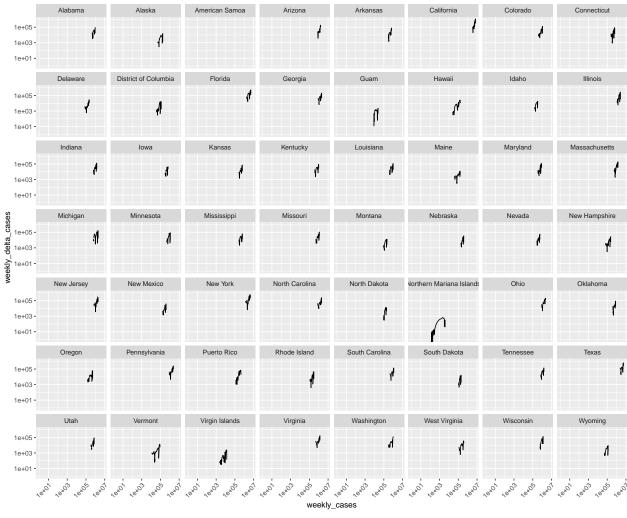

Weekly Rate of Changes

In order to smooth out the curves in the previous graphs, look at them on a weekly basis.

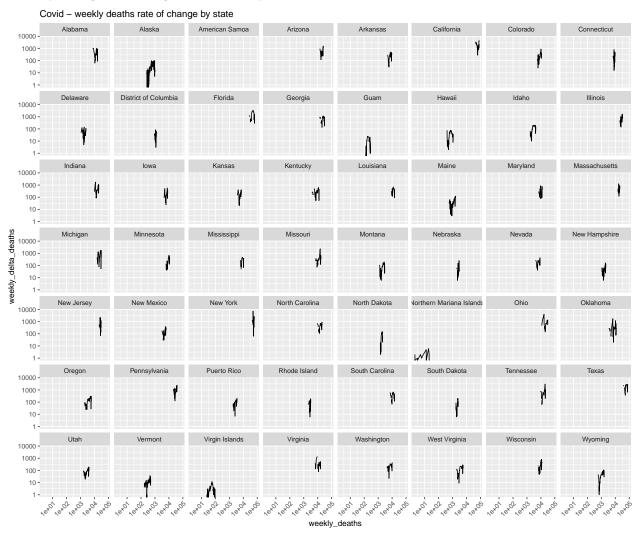

`summarise()` has grouped output by 'state'. You can override using the `.groups` argument.

Weekly Range of Change of Cases by State

Covid – weekly cases rate of change by state

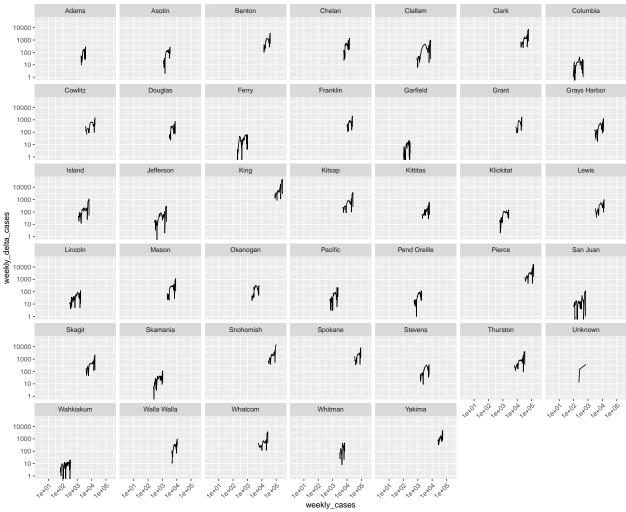

Weekly Range of Change of Deaths by State

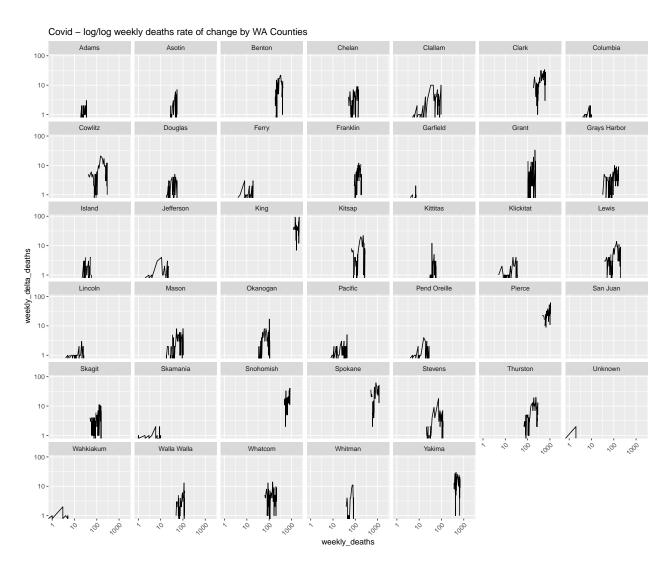

Washington Counties

`summarise()` has grouped output by 'county'. You can override using the `.groups` argument.

California Counties

`summarise()` has grouped output by 'county'. You can override using the `.groups` argument.

Covid - log/log weekly cases rate of change by CA Counties
