quick-analysis by state and WA county

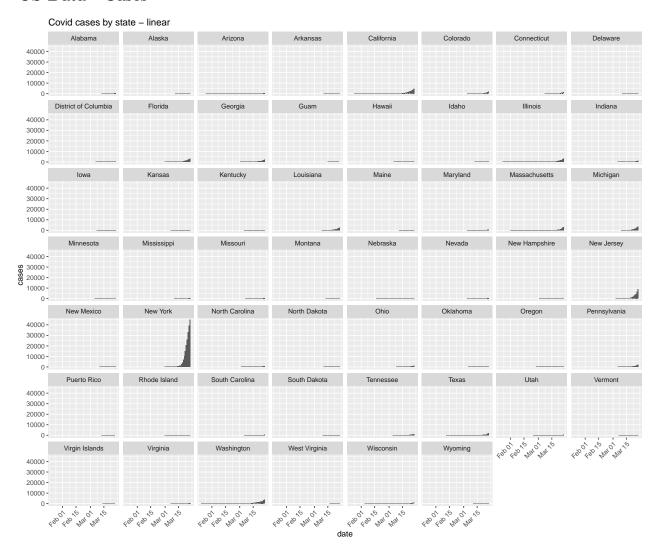

A quick visualization of the published NYT data on US Covid-19 cases by state. Source data may be found here: https://github.com/nytimes/covid-19-data

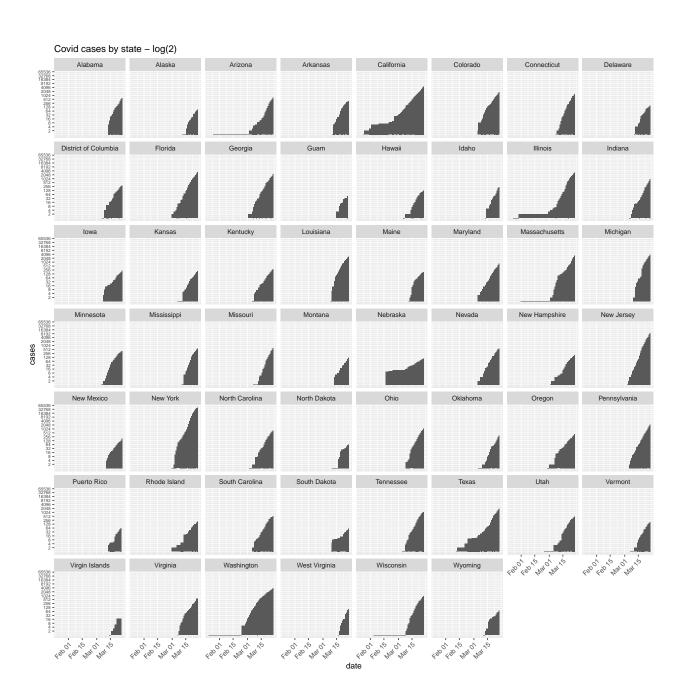

There are two types of graphs here currently:

- Linear this is just an absolute count reported by date
- log(2) this is a log(2) graph of count by date, intended to help display the doubling trend

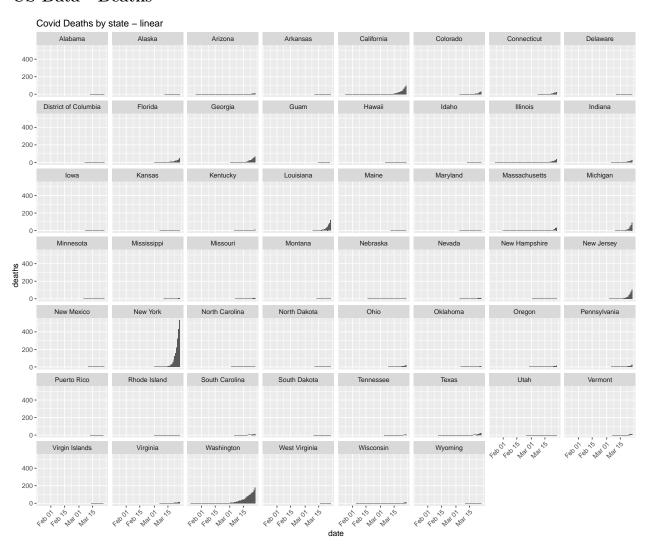

Note that this data is historical, not predictive. It's intended to help illustrate what has happened so far.
