quick-analysis by state and WA county

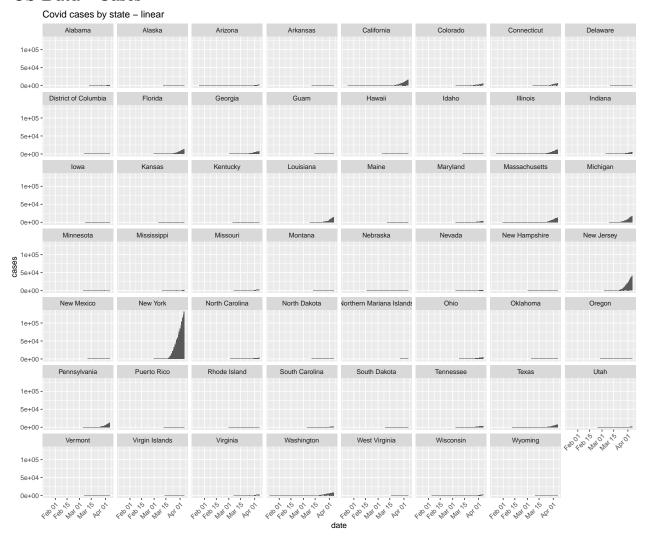

A quick visualization of the published NYT data on US Covid-19 cases by state. Source data may be found here: https://github.com/nytimes/covid-19-data

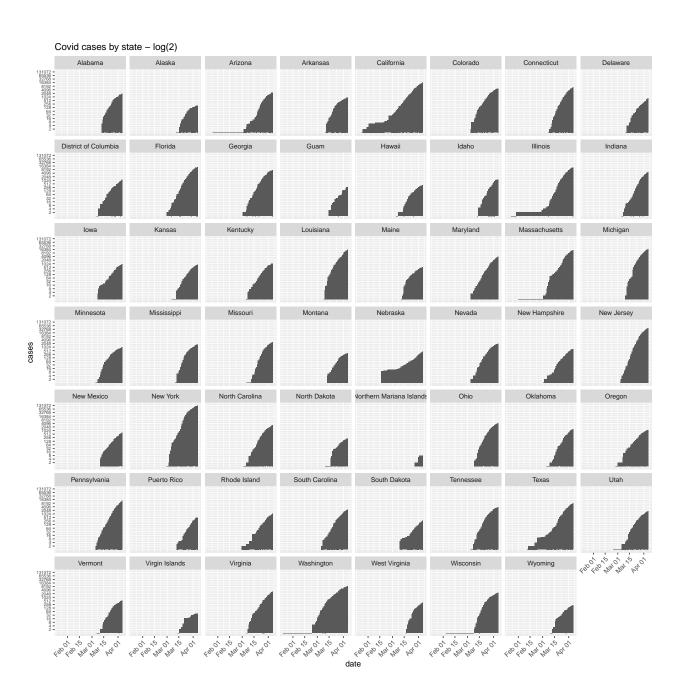

There are two types of graphs here currently:

- Linear this is just an absolute count reported by date
- log(2) this is a log(2) graph of count by date, intended to help display the doubling trend

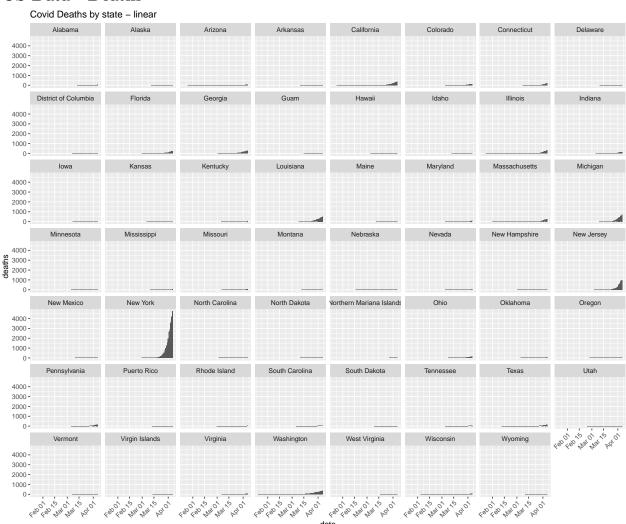

Note that this data is historical, not predictive. It's intended to help illustrate what has happened so far.

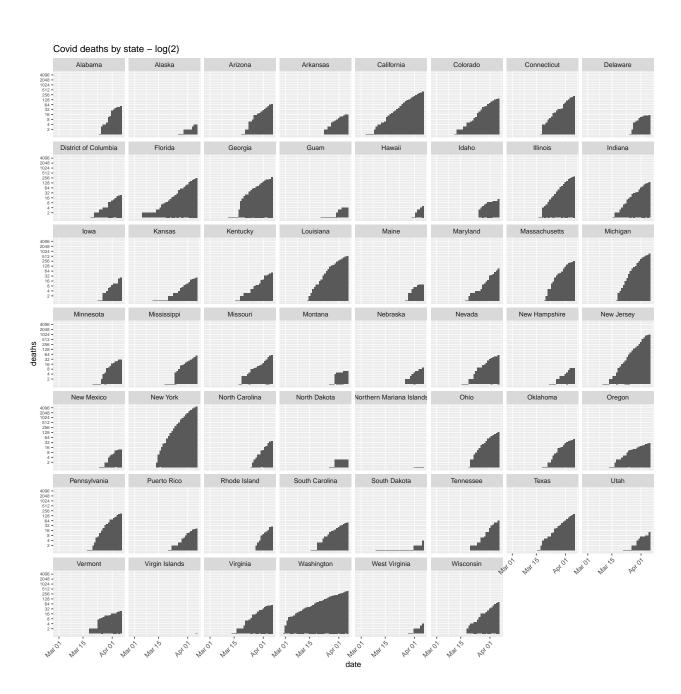

US Data - Cases

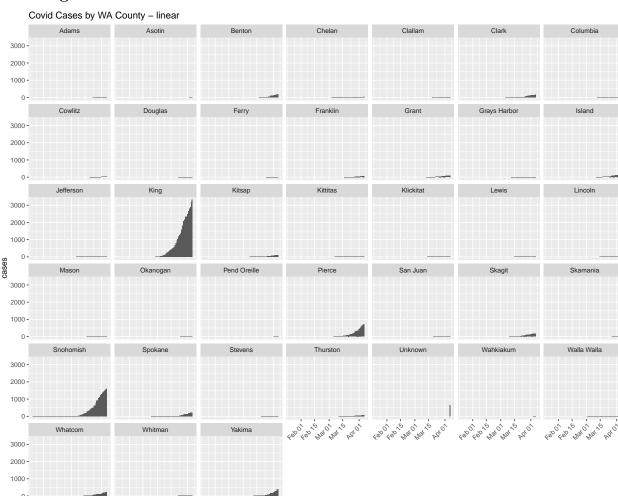

US Data - Deaths

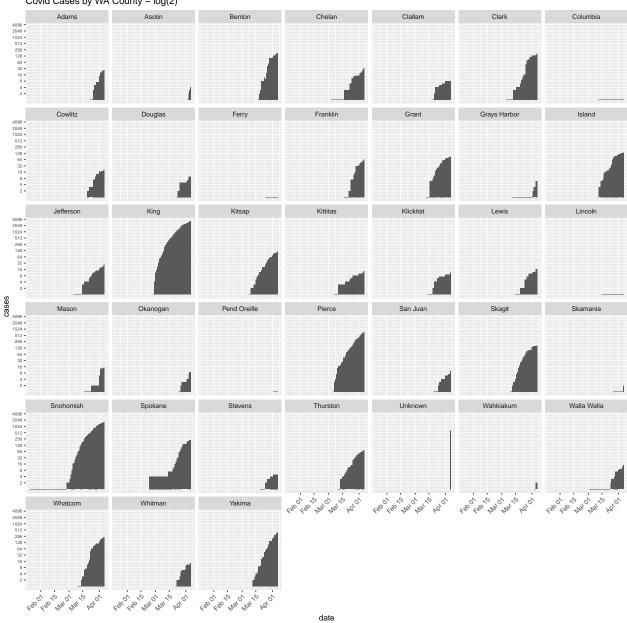

Washington Counties - Cases

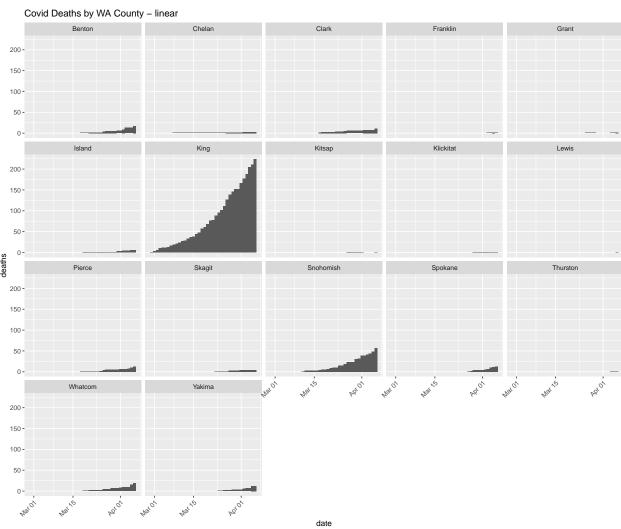

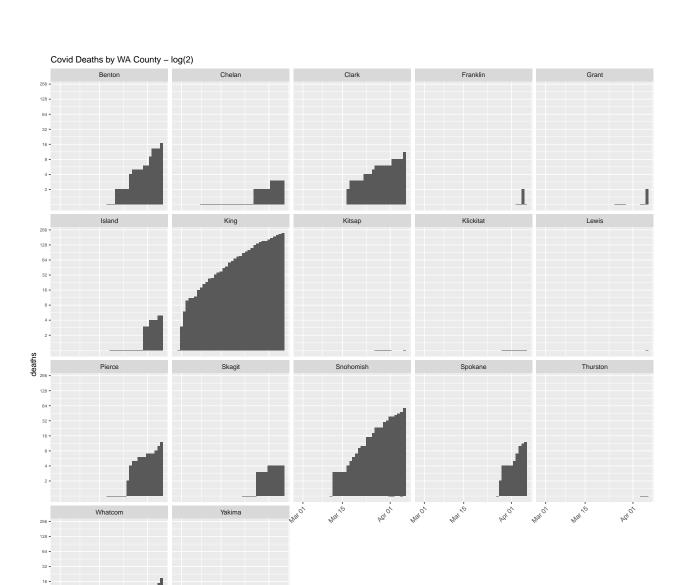

date

Covid Cases by WA County - log(2)

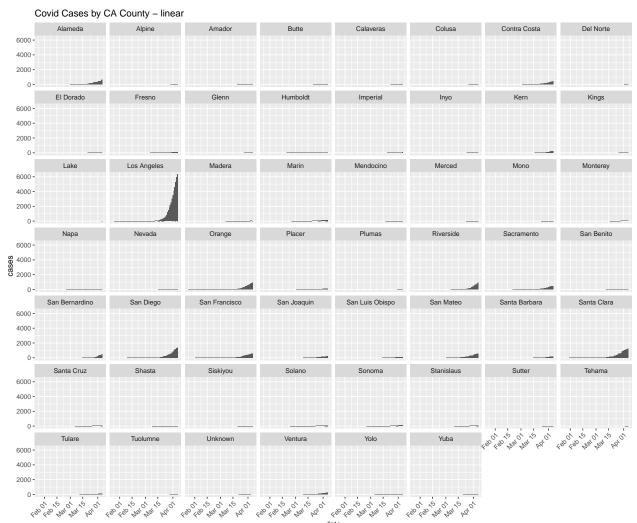

Washington Counties - Deaths

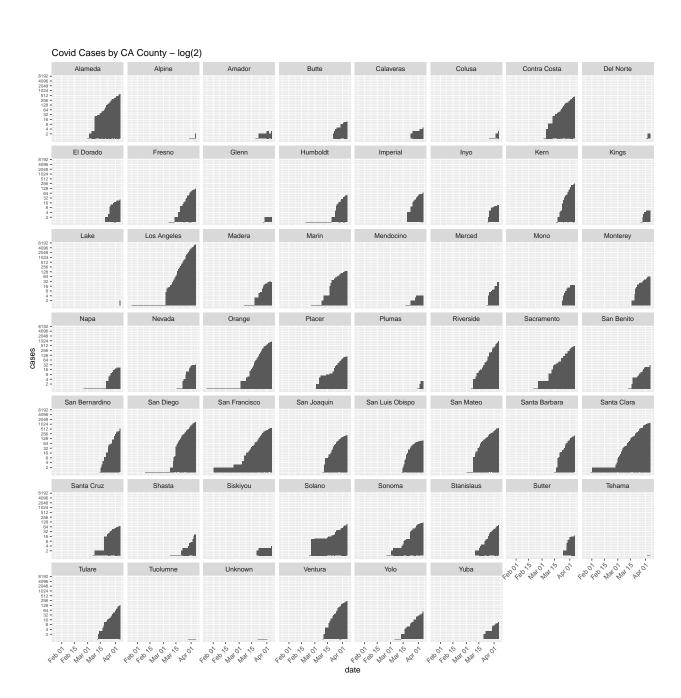

date

California Counties - Cases

Warning: Transformation introduced infinite values in continuous y-axis

Warning: Removed 3 rows containing missing values (geom_col).

California Counties - Deaths
